Mr Moderator. Your committee chosen in 1836, to superintend repairing the road in the South part of the town, report as follows the ~~whole amount~~ expended in 1836 amounted ~~to little~~ short of $337.06 ~~$4.000~~ but the wall not being all removed that year the road could not be completed. The commissioners were called upon and they examined the road, as the wall had not all been moved according to order they did not accept the road as completed at that time. The inhabitants of Newton and vicinity wishing to have a superior road to any in ~~town~~ the region called requested the commissioners last spring to revisit the road, they did so, and your committee waited upon them and received further directions respecting the work to be done. the com.ee thought at that time to lay out about $1.00. additional dollars more would be sufficient to put the road in good repair, this sum was found insufficient, the amount expended this last year, ~~was five thousand~~ was $170.38 short of the ~~hundred dollars~~ the work was done under the immediate superintendence of your committee in the most economical manner they could possibly devise. The commissioners were again called upon to examine the road they said they would attend to it, that your committee need not give themselves any further uneasiness respecting it. ~~your committee therefore conclude that the road is accepted~~ they further added that they think the road is in excelent ~~as good~~ order ~~as any road~~ and that the sum annually raised to repair that road properly expended will keep it in better repair than any road in town similarly located.

In behalf of your committee

Report of Committee on
Roads at the South
part of the Town
1838

Mr Moderator Your Committee chosen last year to examine the road above Mr Benjamin Whites and make such repairs as they thought proper, ask leave to report. Your committee did examine the road and were of opinion that the expence to widen and streighten that road as sugested by a previous committee, was too great a Sum to lay out, for the trifeling advantage the town would receive The length of road to be streightened and widened ~~was~~ 25 rods the ~~lowest~~ at least expence would be two hundred dollars the chief expence would be to dig away the bank and lay the wall. Your committee were of opinion that the town ought not to lay the wall, that it is not customary for towns to ~~lay~~ build the wall in similer cases, ~~&~~ they therefore concluded to cut the bushes ~~and to the road~~ in the road and mend the road, which is all your committee thought proper to ~~do~~ do.

In behalf of your committee

Wm Goddard
